

Making Beds Detail

After you've tucked the sheet in at the end, it should look like example A. Lift the top sheet up so it looks like the example and lay it across the mattress. Then just tuck the little triangle at the bottom in (at the dotted line). When you hang the top sheet over the edge, it should look like example B.

When you are using a blanket too, just put it on over the sheet and tuck the corners in one step.
